DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

Element 12 does not describe in specification.

Appropriate correction is required.

Claim Objections

2. Claim 1 is objected to because of the following informalities:

Claim 1, line 7, change "in said flexible..." to --said flexible...--.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, lines 2-3, it is unclear. The phrase of "an internal layer circuit board which can be a cable portion" is not positive claim.

Regarding claim 1, line 4, it is unclear. The phrase of "external layer circuit board which can be component" is not a positive claim.

Regarding claim 1, lines 4-6, it is unclear. The phrase of "external layer circuit board...at a predetermined position" is not understood. What does applicant mean of "a predetermined position"

Regarding claim 1, lines 7-9, it is unclear. The phrase of "in said flexible multiplayer circuit board...predetermined positions of said internal layer circuit board" is not understood. How can "through hole plated can be formed at predetermined positions of said internal layer circuit board?"

Regarding claim 1, lines 10-14, it is unclear. The phrase of "a surface protection layer formed on an external surface of a wiring pattern...is formed in a region...plated conductor portion" is not understood.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Yanagi et al. (JP 06-085406 A, hereafter as JP)

As best understood to claims 1-4, JP discloses a through hole conduction structure of a flexible multilayer circuit board (100, see an attached paper) and a method for forming a through hole conduction structure of a flexible multiplayer circuit

board as shown in figures 1-12, and also, see an attached paper on a back of an office action, comprising:

an internal layer circuit board (4, 7, 7, 5, 5, hereafter A) which being formed a cable portion; and

an external layer circuit board (8, 9, hereafter B) which being formed a component mounting portion laminated on one side or both sides of said internal layer circuit board (see figures 1-2),

wherein, said flexible multilayer circuit board having a through hole plated conduction portion (10) formed of said internal layer circuit board and said external layer circuit board,

a surface protection layer (6A, 6B), which is a cover film consisting of polyimide resin forming on an external surface of a wiring pattern (5) of said internal layer circuit board is formed in a region retreated toward the outside from a position of a through hole (11) for the through hole plated conduction portion (10).

Conclusion
